

GUIDELINES FOR PREPARATION OF POSTERS KUHS NATIONAL CONFERENCE ON STUDENTS MEDICAL RESEARCH 2017

In a poster presentation, the authors illustrate their findings through graphs, photos, diagrams and a small amount of bullet-point text on the poster boards. The authors then hold discussions with the conference attendees.

General Format:

We prefer posters to be large single sheet of paper or flex that has to be rolled in a tube for carrying.

Size:

The area for sticking your poster will be no more than 3 feet in height, by 2 feet in width. Do not exceed these size limits.

Title & Email address:

The title of a poster should use the same words written in your original submission for review. Above or at the top of the poster there should be a Header with the title and your email address. The lettering for this section should be not less than 1 inch high. The Title should be very prominent, so that interested delegates don't miss it. It should be legible from a distance of up to 2 meters. Use uppercase with lowercase, not all-Caps.

Legibility:

Content should be well labeled and headlines legible from a distance of up to 2 meters. Use upper and lowercase letters. Avoid rows and rows of closely spaced text. You should prefer to explain details verbally rather than expect visitors to read pages after pages of small text on the poster boards. Lines of text should contain about 6 to 8 words at most. Colors should be used to establish differences, not for decoration.

Organization:

Organizing the poster presentation into sections such as Introduction, Methods, Results and Conclusions is very helpful. Place these sections in the sequence that the viewer is expected to read them. Sheets should be numbered.

Please print all sheets in advance and bring them to the conference with you. The poster area does not have a printing facility. The conference will not offer presenters any additional media for the poster sessions. No audio-visual equipment, Internet/computer connection will be available.
